DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 3, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d). In claims 4-8, references to flexible polymer substrate and the conductive material are vague since such limitations have not been previously presented.

Claim Rejections - 35 USC § 102

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Humphrey (6,171,239). Applicant's attention is directed to the Figure 2B and 2C embodiment as detailed at column 8, line 49+. In light of the discussion relating to the Figure 2A embodiment at column 8, lines 9-26, the particular dimensions are deemed to be inherent in the Figure 2A and B embodiment.

Art Unit: 3739

Claims 1, 2, 6, and 8 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Edell et al (2002/0198582). Applicant's attention is directed to figure 8 and paragraphs [0044] to [0046].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 2, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuperstein (4,461,304) in view of Humphrey (6,171,239). The basic brain probe is disclosed by Kuperstein (see Figures 4-6 and the accompanying description). The reference discloses a length of 2mm for the active recording area (column 3, lines 64-65). Overall lengths of greater than 5mm are disclosed by Humphrey at column 8, lines 17-18. Given this teaching, it would have been obvious to form the Kuperstein device with the claimed length to effect recording/stimulation at varying depths.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Humphrey (6,171,239), Edell et al (2002/0198582), or Kuperstein (4,461,304) in view of Humphrey (6,171,239) as applied to claim1 above, and further in view of Lynch et al (5,038,781). The particular material for the polymer is not disclosed by the references. Lynch et al shows the use of polyether sulfone at column 8, line 23 for a probe base. Accordingly, the use of the same in any of the references would have been obvious to the skilled artisan since it is merely a design expedient not affecting performance of the device.

Art Unit: 3739

Claims 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Humphrey (6,171,239), Edell et al (2002/0198582), or Kuperstein (4,461,304) in view of Humphrey (6,171,239) as applied to claim1 above, and further in view of Hofmann et al (6,330,466). The particular materials for the polymer and conductors are not disclosed by the references. Hofmann et al shows the use of polyimide and conductive polymer at column 3, lines 23-37 for a probe. Accordingly, the use of the same in any of the references would have been obvious to the skilled artisan since they are merely design expedients not affecting performance of the device.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Humphrey (6,171,239) or Kuperstein (4,461,304) in view of Humphrey (6,171,239) as applied to claim1 above, and further in view of Edell et al (2002/0198582). The particular material for the polymer is not disclosed by the references. Edell et al shows the use of liquid crystal polymer at for a probe base. Accordingly, the use of the same in any of the references would have been obvious to the skilled artisan since it is merely a design expedient not affecting performance of the device.

Allowable Subject Matter

Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Specification

The disclosure is objected to because of the following informalities: page 9, line is vague. Appropriate correction is required.

Art Unit: 3739

Drawings

The drawings are objected to because numeral 72 has been omitted. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art discloses similar probes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lee S. Cohen whose telephone number is 571-272-4763. The examiner can normally be reached on Monday-Friday, 7:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda Dvorak can be reached on 571-272-4764. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
